MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Compliance With Installation Fugitive Dust Control Plan

1. PURPOSE. To mandate education of Fort Carson personnel (military, civilians, and contractors) concerning the requirement to comply with the state-approved Fort Carson Fugitive Dust Control Plan (Encl 1).
2. APPLICABILITY. This directive applies to all Fort Carson units, commands, activities, and personnel (including civilian employees and supporting contractors) whether assigned or attached to Fort Carson and the Piñon Canyon Maneuver Site, as well as contract companies working for Fort Carson.
3. MISSION.
 - a. Fort Carson manages ambient air emissions under a State of Colorado Title V Operating Permit. Colorado Air Quality Control Commission Regulation No. 1 requires the Directorate of Environmental Compliance and Management (DECAM) to develop this enforceable control plan for dust emissions.
 - b. Military personnel, civilian employees and contractor companys whose operational and maintenance activities generate dust must be aware of this plan and choose the best available methods that are technologically feasible and economically reasonable to prevent, reduce, and control dust emissions. Control measures listed in the plan are the most common ones recommended for implementation, but should not be relied upon as a comprehensive list.
 - c. The State of Colorado will inspect Fort Carson for compliance with this plan at least once every fiscal year. Violations can result in a Notice Of Violation (NOV), which will be addressed by the military unit, directorate, or contractor company responsible for the violation.
 - d. Military personnel, civilian employees, and contractor company can obtain the plan at <http://sems.carson.army.mil/environmental/air/default.htm> or on a CD-ROM from the POC as stated below, Installation Air Program.
 - e. Leaders are to ensure that all Soldiers, civilian employees, and contractor companies assigned to or supporting Fort Carson organizations whose operational/maintenance activities have the potential for generating dust emissions, receive this memorandum.
 - f. Regardless of the contract mechanixm used, project proponents responsible for requesting contracts must make reference to this control plan in their contracts, as well as projects that have the potential for creating dust emissions, such as construction, demolition and abrasive blasting.
